

OSCART 170cm Titanium Tip Fast Action Line PE0.3-3# Octopus Fishing Rods

Our Product Introduction

for more products please visit us on fishing-set.com

Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 298
- Minimum Order Quantity: 500 Pieces
- Price: 29 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 20000 Pieces/Month

Product Specification

- Product Name: Fast Action Octopus Fishing Rods
- Material: Carbon
- Top Diameter: 1.1mm
- Hardness: Soft
- Category: Lure Rod
- Fishing Rods Type: Casting Rods, Freshwater Rods
- Tip: Titanium Tip
- Position: STREAM, River, Lake, Ocean Beach Fishing, Ocean Boat Fishing, Ocean Rock Fshing, Reservoir Pond

Stainless steel guide frames & ceramic inserts reducing friction from braided lines

Product Description

OSCART 170cm Titanium Tip Fast Action Line PE0.3-3# Octopus Fishing Rods

A titanium tip is a type of guide or guide frame that is made from titanium or incorporates titanium components. This material offers several advantages in fishing rod design:

Strength and Durability: Titanium is known for its exceptional strength-to-weight ratio. Titanium tips are incredibly strong and resistant to bending or breaking, making them highly durable. They can withstand the stress and pressure that can occur during the casting and fighting of fish.

Corrosion Resistance: Titanium is highly corrosion-resistant, which is especially important in saltwater fishing environments where rods are exposed to saltwater, which can cause other metals to corrode over time. A titanium tip is less likely to corrode or rust compared to conventional materials like stainless steel.

Lightweight: Despite its strength, titanium is relatively lightweight. This means that adding a titanium tip to a fishing rod doesn't significantly increase the overall weight of the rod, making it easier to handle and cast.

Sensitivity: Titanium tips can enhance the sensitivity of a fishing rod. The material's stiffness allows for better transmission of vibrations, which is important for detecting subtle movements, bites, or strikes from fish.

Smooth Line Flow: Titanium guides or tips often have a smooth surface finish, reducing friction and allowing the fishing line to flow smoothly during casting and retrieval. This can result in longer casts and reduced wear on the fishing line.

Reduced Heat Buildup: Titanium has excellent heat dissipation properties. When a fishing line runs through titanium guides or touches a titanium tip, there is less risk of heat buildup, which can be a concern when using braided lines or lines with high-speed reels.

**titanium tip , classic action,

inserts reducing friction from braided lines**

Titanium tips can be found in various types of fishing rods, including spinning rods, casting rods, and fly rods. They are particularly popular in high-end fishing rods designed for specific applications, such as saltwater fishing, heavy-duty freshwater fishing, or situations where sensitivity and casting performance are crucial.

While titanium tips offer several benefits, they can also be more expensive than traditional guide materials like stainless steel or ceramic. Anglers often choose fishing rods with titanium tips when they are looking for top-tier performance and are willing to invest in a high-quality rod.

Light, Sensitive & Durable - The OSCART rod is constructed with high quality carbon, titanium tip featuring precisely wrapped guides at four different angles to ensure the best performance, it is then powered by X-shaped high temperature molding resin. Boast exceptional sensitivity and is light in the hand

Key Attributes

Place of Origin	Shandong, China
Ships From	China
Top Diameter	1.1mm
Hardness	Soft
Position	STREAM, River, Lake, Ocean Beach Fishing, Ocean Boat Fishing, Ocean Rock Fshing, Reservoir Pond
Category	Lure Rod
Fishing Rods Type	Casting rods, Freshwater Rods
Brand Name	CUSTOMISED
Model Number	298
Material	Carbon
Tip	Titanium Tip
Action	Fast Action

Packaging and Delivery

Selling Units:	Single item
Single package size:	150X10X10 cm
Single gross weight:	3.000 kg
